Please Review Project Information and Estimate for Approval:

Project Description (short): 17 (30 Characters)	Route 2A/12 Study
Project Description (long): 254 (254 Characters)	Study to review existing conditions, future land use and travel characteristics for Routes 2A, 12 & Mohegan-Pequot Bridge; 5-mile study area includes approximately 15 intersections in Montville, Preston, Norwich, Ledyard. Term thru 8/31/26, PAED 2/28/30.
Long Description/Justification: 974 (1333 Characters)	This Routes 2A, 12, and Mohegan-Pequot Bridge Needs and Deficiency Study stems from CTDOT's proposal to rehab the Mohegan-Pequot Bridge and a request from local officials to widen the structure to accommodate upcoming development in the area. The study will document and analyze the existing and projected future conditions of Route 2A over the Thames River (the Mohegan-Pequot Bridge) and the surrounding roadways to determine if there is a need to upgrade the existing bridge or add a new crossing. Quantitative methodologies will be used to understand travel demand in relation to the phasing, constructability, and planning-level order of magnitude costs that will provide information to the CTDOT and other entities to inform the decision-making process and determine future recommended improvements. Based on the 2024 Stewardship & Oversight Implementation Plan, this study is assumed to be a Non-PODI as a low risk stand-alone planning study less than $5M on the NHS.
Project Manager: **Patrick Zapatka**	
Project Engineer: **Joshua Lecar**	Additional notes: The project is assumed to reach the Open status in Core-CT ~7/1/25, followed by Notice to Proceed, and take ~14 months to complete. This project is located within the Norwich-New London urban area of the Southeastern CT COG and is being programmed to obligate available STBG/STP-Other Urban funds.

Scope Code: #N/A (Scope Code is only for a project w/CN phase)
